

Call for application: Course on Translational Research and Medicine Development

TMex 2023 - Translational Medicine explained
Palau Macaya, Barcelona – 13-17 February 2023

Target audience

PhD/MD students in the second half of their PhD, postdocs and other young scientists involved in biomedical research.

About the course

The TMex course

- Provides a birds eye view of the medicine discovery & development process
- Raises awareness of obstacles and challenges involved
- Introduces the different players (academia, SME, pharma, regulatory) and career options

Registration (now open)

First come, first serve. There are only 30 seats, so we recommend applying early. The registration will close when all seats are filled.

Costs

The course fee is 650€.

A special discounted fee of 475€ applies for EATRIS members & I2TRON students.

A special discounted fee of 250€ applies for VHIR students and EUPATI fellows.

What our students say¹

- “If you have the opportunity to take part in this course – do it. It will fundamentally change your view on how your work as a research scientist can make a difference in the real world outside your lab” (Konstantin Kuhne)
- “Very interactive course with a non-traditional approach. The course reflects the reality of translational medicine: getting a lot of people with different backgrounds to work together as a team” (Miriam Ayuso)
- “It was a difficult decision to leave the lab for 5 days but it is absolutely worth it” (Kevin Ferreira)
- “This course taught me things I didn’t know would even exist. The course inspired me that the PhD is more than just gaining scientific knowledge, but also to use the time to work on my personality” (Inga Hensel)

Confirmed speakers

Maria Borrell Pages, Senior Researcher and Patient Advocate, Sant Pau Hospital

Keith Williams, Director, KW Drug Developments

Piret Pajula & Jake Fairnie, EATRIS communications team

Mike Hardman, Independent (formerly AstraZeneca)

Eva Colas Ortega, Senior Researcher, VHIR

Ramón Martí Seves, Head neuromuscular and mitochondrial pathology, VHIR

Björn Gerlach, Partner and COO, PAASP
